Notice to all Parents/Guardians of Players and Team Managers in MAVERICKS HOCKEY ASSOCIATION:

MAVERICKS HOCKEY ASSOCIATION is wanting to ensure that any player who incurs an injury on or off the ice that requires medical attention will be required to supply a note from the parents/guardians and Team Managers informing the Director of Safety and Governance with MAVERICKS HOCKEY ASSOCIATION of the injury to the player.

A physician's note is required that states *the date* the player is allowed to return to play and practice, *as well as any restrictions that may be placed on that player.*

If a player is returning "with restrictions", a further note from the player's physician will be required prior to returning to full play stating the date the player can return without any restrictions. This is to ensure that no player's health is jeopardized when returning from any injury.

MAVERICKS HOCKEY ASSOCIATION understands that a player's health is paramount to their success in sports and in life and wants to protect our player's health.

MAVERICKS HOCKEY ASSOCIATION will hold all player injuries in confidence and will only be documented to protect players. Any medical information provided is for tracking injured players and their return to play/practice. The understanding is that medical information is very sensitive and would be voluntarily given to MAVERICKS HOCKEY ASSOCIATION to help assist a player through their injury.

Thank you,
Alan Miller
Director of Safety and Governance
Maverick Hockey Association
